Powerful - Frisky - Good-Looking

... with our high-spirited BELLA. With our BELLA we are going to enjoy the fine weather to the fall, she will make sure we have a grand holiday, independent of train times and other irksome restrictions. Shying that never dates, a long trouble-free life - those are the features that make the BELLA a good investment for years to come - and that is the most important point when choosing a scooter. Design of the BELLA 204 has been carefully thought out down to the last nut: efficient, practical, elegant and well-balanced in appearance. The BELLA 204 embodies all the experience that a leading manufacturer has accumulated over the decades. BELLA owners put their confident trust in their machine, for they know it is backed by the name of ZONDAPP - the name that spells reliability first and foremost.

With the full power developed by its 12 h.p., the BELLA pulls like a dream. The generous fan-shaped cylinder head cooling fins, placed right at the centre of the air stream, ensure intensive cooling - even on steep hills. You get 10% more engine capacity, because BELLA designers have made the customary fan superfluous. The BELLA's famous road-holding characteristics are due to the 12-inch wheels, the cushioned responsiveness of the hydraulically damped pivoted fork with its extra-long spring travel and its perfect steering control. And, of course, the BELLA is fitted with quick-action, firmly gripping brakes on which you can rely in any emergency. The sturdy 2-stroke engine has a modern, foot-operated 4-speed steel ball gear selection system, with feather-light gear changing by rocking foot pedal. Park your BELLA in two ways: for quick parking on the open road, just swing out the prop stand; on soft or muddy ground, use the rock-steady centre stand.

The BELLA's equipment is luxurious to match its styling: Elegant nacelle and front fairings enclose the Bowden cables - Combined head light control, overtaking and signalling flasher, horn and dipping switch - Polished light-alloy instrument panel, electric starter, electric neutral indicator and ignition warning light, light switch, illuminated speedometer, twin luggage hooks. Two 11 a.h. batteries in the battery and switchbox housing below the instrument panel are fed by a 100 W generator. Air intake and exhaust silencer make the BELLA sound as good as it looks. The sparking plug can be replaced in seconds without getting dirty: just lift the attractive armamental panel and the plug is ready to hand. To fill up the tank, merely fold back the comfortable dual seat. Tools are accommodated in their special rooey toolbox concealed behind the number plate, opened simply with a coin. Two luggage carriers, left and right, are standard equipment. Your BELLA 204 is available in several attractive two-tone finishes: contemporary glabaster grey with derby red, golf blue, Sahara yellow or black.
